### **HUMAN CAPITAL EUROPE**

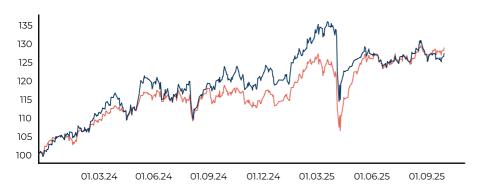

#### INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Stoxx Europe 600 EUR Index NTR (SXXR) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Benchmark Index is a broad liquid index with a fixed number of 600 components (600 stocks), representing large, mid and small capitalisation companies across 17 countries of the European region.

The Fund is actively managed, meaning that the equity exposure may significantly deviate from the components of the Benchmark Index. Equities of the Portfolio will be selected primarily according to their ESG rating, based on a best-in-class approach. The fund is article 8 of SFDR. To do so, equities of the Investment Universe will be ranked using MSCI ESG rating methodology which identifies ESG material risks and opportunities for each industry through a quantitative model that looks at ranges and average values for each industry for externalized impacts such as carbon intensity, water intensity, and injury rates. Equities with the highest ESG rating will be retained by excluding at least 20% of the equities comprising the Investment Universe with the lowest ESG rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). The exposure of the Fund to European equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments. The portfolio will be weighted in accordance with the Methodology developed by SG29H's dedicated Private Banking equity portfolio management team.

The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

### MONTHLY COMMENT

September's economic data highlight contrasting dynamics between the main geographic areas.

In the eurozone, the ECB confirmed its cautious stance by keeping its key interest rate at 2% during the September 11 meeting, considering that monetary policy remains appropriate in a context of moderate growth and inflation close to the target. Indeed, the latest ECB projections anticipate total and core inflation converging slightly below the 2% inflation target, with growth settling at 1%, close to potential. Moreover, September inflation data in the four major economies of the monetary area (1.2% in France, 2.4% in Germany) also align with this scenario. PMI indices reflect overall stable activity (51.2) but contrasting trends, with contraction in France's manufacturing sector, while Germany benefits from a recovery driven by the services sector. Finally, if inflation slows further in the coming months, a monetary easing could be considered by the ECB by the end of the year.

In the United States, the Fed has initiated a rate-cutting cycle, bringing its target range to 4.00-4.25% amid accelerating inflation but a slowing labor market. The August Consumer Price Index (CPI) shows inflation at 2.9%, with core inflation at 3.11%, reflecting notably the persistent impacts of tariff increases and a strong rise in durable goods prices, as well as services inflation remaining at a 3% level. Despite this inflationary context, the upward revision of second-quarter GDP, now estimated at 3.8% year-on-year, indicates stronger-than-expected domestic demand. In the labor market, data show a significant slowdown: initial jobless claims in August reached 263,000, an unprecedented level since 2021.

On equity markets, the trend is generally positive in September. In the United States, the S&P 500 rose by 3.53%, while the Nasdaq recorded a more pronounced increase of 5.4%, driven by the performance of the AI sector. In Europe, the Euro Stoxx 50 gained 1.72%, with strong performance from the Ibex at +3.61% and a notable rise of the CAC 40 at +2.49%, while the DAX slightly declined by 0.09%.
