

BOREAS EUROZONE

INVESTMENT OBJECTIVE

The investment objective of SOLYS – Boreas Eurozone (the "Sub-Fund") is to generate performance over a long-term horizon by exploiting investment opportunities on the banking equity markets of the Eurozone while providing a fixed stream of distributions. There is no pertinent or relevant benchmark index for the Sub-Fund, due to its actively managed investment strategy. Investor may however choose to use the Euro Stoxx Banks EUR (Net Return) index for indicative ex-post performance comparison purposes.

The Sub-Fund seeks to achieve its objective by investing in an OTC derivative the purpose of which is to reach its investment objective by exchanging the investment proceeds against the value of the Portfolio (as defined hereafter). The 'Portfolio' consists primarily of financial futures positions rolled on an equity financial index providing exposure to the banking sector of the Eurozone, including the Euro Stoxx Banks EUR (Price Return) (SX7E), or any of its successor index. In addition to such financial futures, the Portfolio may comprise equities listed or traded on regulated markets of issuers from the banking sector which have their registered office or carry out their predominant activities in countries of the Eurozone. Rolled financial futures and equities composing the Portfolio will be selected by a proprietary methodology designed by the Management Company which relies on a financial analysis that ranks the instruments of the investment universe. The variable exposure mechanism implemented by the Sub-Fund aims to provide the Sub-Fund with an average exposure to the Eurozone equity markets over five (5) years that exceeds 80%. In order to mitigate risks or enhance the Sub-Fund's performance, the exposure of the Sub-Fund to equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least.

The Sub-Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

The economic data from the summer confirm resilient growth in the main economies. In the eurozone, Q2 growth reached 0.1% quarter-on-quarter, in line with an annual growth of 1% for 2025. Differences remain marked between the main economies: southern economies still show strong momentum, while growth is more moderate in northern economies, with 0.3% in France and a further contraction of activity in Germany. Inflation in August, at 2.1% for total inflation and 2.3% for core inflation, confirms the continuation of the disinflationary trend. In this context, the ECB maintained its key interest rate at 2% in July and is expected to keep it at this level at the September meeting.

In the United States, although economic data remain disrupted by the trade war, underlying data show an economy gradually slowing to a pace of 1.5%-2%, with a less dynamic labor market but a resurgence of inflation. Indeed, after the contraction in the first quarter, GDP recorded an expansion of 3.3% quarter-on-quarter annualized and domestic demand expanded by 1.5%. Labor market data show a clear slowdown in job creation but an unemployment rate still low at 4.2% in July. Tariffs are beginning to have an effect on inflation, with July's PCE inflation at 2.6% year-on-year. The slowdown in the labor market has led the Fed to announce a gradual easing of its monetary policy, with a rate cut very likely at the September meeting.

In this context, equity markets showed an upward trend in August. On the US markets, the S&P 500 increased by 1.9% in August while the Nasdaq rose 0.8% over the same period, supported by strong profit growth, notably in the AI sector (profits of the Magnificent 7 were up 27% year-on-year in Q2-25). On the European side, the increase was somewhat more modest, with the Euro Stoxx 50 up 0.6% in August, notably with a 1% decline in the CAC 40 following new political tensions.
