

# BOREAS EUROZONE

27 February 2026

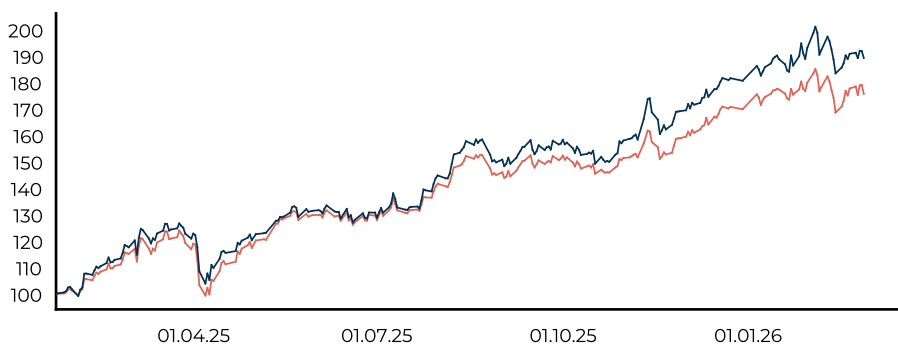

## INVESTMENT OBJECTIVE

The investment objective of SOLYS – Boreas Eurozone (the "Sub-Fund") is to generate performance over a long-term horizon by exploiting investment opportunities on the banking equity markets of the Eurozone while providing a fixed stream of distributions. There is no pertinent or relevant benchmark index for the Sub-Fund, due to its actively managed investment strategy. Investor may however choose to use the Euro Stoxx Banks EUR (Net Return) index for indicative ex-post performance comparison purposes.

The Sub-Fund seeks to achieve its objective by investing in an OTC derivative the purpose of which is to reach its investment objective by exchanging the investment proceeds against the value of the Portfolio (as defined hereafter). The 'Portfolio' consists primarily of financial futures positions rolled on an equity financial index providing exposure to the banking sector of the Eurozone, including the Euro Stoxx Banks EUR (Price Return) (SX7E), or any of its successor index. In addition to such financial futures, the Portfolio may comprise equities listed or traded on regulated markets of issuers from the banking sector which have their registered office or carry out their predominant activities in countries of the Eurozone. Rolled financial futures and equities composing the Portfolio will be selected by a proprietary methodology designed by the Management Company which relies on a financial analysis that ranks the instruments of the investment universe. The variable exposure mechanism implemented by the Sub-Fund aims to provide the Sub-Fund with an average exposure to the Eurozone equity markets over five (5) years that exceeds 80%. In order to mitigate risks or enhance the Sub-Fund's performance, the exposure of the Sub-Fund to equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least.

The Sub-Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

## PERFORMANCE SINCE INCEPTION

Performance	MTD	YTD	3 Months	6 Months	1 Year	3 Years	Since Launch
BOREAS EUROZONE Class I (EUR) DIST	-2.00%	4.74%	11.88%	26.29%	60.75%	-	89.44%

### MONTHLY COMMENT

U.S. equities ended February lower. Sector performance showed a rotation out of technology, with basic materials, consumer defensive, and utilities emerging as the main gainers. Technology stocks struggled as Nvidia's strong quarterly results were not enough to ease concerns about AI-related investments and the need for broader market leadership. Producer prices rose more than expected: the producer price index increased by 0.5% in January and 2.9% year-over-year, signaling persistent inflation and suggesting that the Federal Reserve remains far from its 2% target. Services drove much of the increase, with final demand services rising 0.8% in January—the largest monthly gain since July.

In Europe, markets continued their positive momentum, with clear outperformance from energy, utilities, and consumer staples, supported by robust macroeconomic trends, an investment supercycle, and growing datacenter-related demand. European equities also acted as a safe haven from AI-related fears that were pressuring U.S. technology stocks.
