ANDANTE TRANSATLANTIC

31 March 2026

INVESTMENT OBJECTIVE

The investment objective of SOLYS – ANDANTE TRANSATLANTIC (the "Sub-Fund") is to generate performance over the long term by exploiting investment opportunities on the equity markets while providing a fixed stream of distribution. There is no pertinent or relevant benchmark index for the Sub-Fund, due to its actively managed investment strategy. Investor may however choose to use the Solactive GBS CW DM US & Eurozone EUR Index NTR index for indicative ex-post performance comparison purposes.

Equities composing the Portfolio will be selected by a proprietary methodology designed by the Management Company (the "Methodology") which relies on a non-financial analysis that ranks the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria combined with a financial analysis that includes bias towards equities issued by companies that should take advantage of reshoring initiatives. The variable exposure mechanism implemented by the Fund aims to provide the Fund with an average exposure to equity markets over five (5) years that exceeds 80%.The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). In order to mitigate risks or enhance the Sub-Fund's performance, the exposure of the Fund to equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments.

The Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

The month of March was heavily marked by the conflict in the Middle East and the closure of the Strait of Hormuz, reigniting tensions in hydrocarbon markets. Oil has been at the heart of the crisis, with significant volatility: Brent surged by 46% in March (+70% YTD) and WTI by 56% (+78% YTD), rekindling fears of a renewed wave of global inflation.
In the United States, the first activity indicators for March—the Purchasing Managers' Index (PMI)—signal a slight slowdown. The composite index fell by 0.5 points compared with February, reaching 51.4, while still remaining in expansion territory.
U.S. consumer inflation (CPI) for February remained stable compared with January, at 2.4%, and 2.5% for core inflation. At its March 18 meeting, the Federal Reserve kept its policy rates within the 3.50% to 3.75% range. Market expectations shifted considerably over the month, moving from anticipating two rate cuts to expecting one rate hike by year-end.
In the euro area, the PMI survey also points to a slowdown in activity. The composite index declined from 51.9 in February to 50.5 in March, but this drop stems mainly from services, while the manufacturing sector improved slightly. Eurozone inflation reached 2.5% in March, a 0.6point increase compared with February, surpassing the European Central Bank's (ECB) 2% target. The ECB is maintaining its policy rate at 2.00% for now but stated it is ready to act if inflationary pressures persist. The institution also revised its growth forecast downward—to 0.9% for 2026 (-0.3 points compared with December)—and its inflation forecast upward (+2.6%). As in the U.S., market expectations shifted significantly, with investors now anticipating three rate hikes over the course of the year. In this turbulent context, equity markets experienced a sharp correction and turned negative. In March, U.S. indices posted heavy losses: -5.5% for the S&P 500 and -5.17% for the Nasdaq 100. In the euro area, which is more sensitive to energy-related tensions, rising prices have weighed even more on markets: the EUROSTOXX fell by more than 8%, the CAC 40 by 9%, the DAX by 10%, and the IBEX by 7%.
