Key features of this product

Type: Undertakings for Collective Investments in Transferable Securities (UCITS)

Duration: This Fund was established for a term of 99 years.

Objectives:

This Fund is actively managed, which means that the Management Company makes all investment decisions it feels are necessary to achieve its investment objective, with full discretion as regards to the portfolio's allocation and overall level of market exposure. The Fund will only invest in the components of the Benchmark Index but has no obligation to align its positions with the weightings of this index. The portfolio may deviate significantly from the Benchmark Index in terms of both its components and their weightings in the portfolio.

The Fund's investment objective is to outperform the Solactive GBS Global Markets Investable Universe EUR Index TR (the "Benchmark Index") over a long-term investment horizon, by seizing opportunities in equity markets, while distributing a steady stream of income.

The Fund seeks to achieve its objective by investing in a diversified basket of securities that may include fixed-rate and floating-rate debt securities issued or guaranteed by eurozone sovereign states, and shares or units of UCITS funds and other collective investment undertakings (the "Basket") and/or in an over-the-counter derivative instrument (the "Swap") that exchanges the proceeds of the investment for the performance of the Portfolio (as defined below).

The Portfolio consists mainly of equities listed or traded on Regulated Markets issued by companies having their registered office or main place of business in a Benchmark Index country.

The share currency is the Euro (EUR).

Invested financial instruments: Standardised derivatives contracts (futures) or contracts traded over-the-counter (forwards), options, swaps and swaptions.

Dividend policy: All of the Fund's amounts that are available for distribution will be distributed.

Net asset value: Calculated every day that the relevant stock exchanges are open and on which orders can be executed.

Subscription and Redemption: One Business Day before any Dealing Day at 3:00 pm Luxembourg time at the latest.

Eligible investors: This Fund unit class is available to all investors, except for US Persons.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within less than five years.

Depositary: Société Générale

What are the risks and potential rewards?

Synthetic Risk Indicator:

This risk indicator assumes that you stay invested for at least 5 years. The actual risk incurred may be quite different if you leave the Fund prematurely, and this may adversely affect your return. This risk indicator measures this product's level of risk relative to that of other investment products. It reflects the probability that adverse market movements may cause this financial product to suffer a loss, or that we may not be able to pay you.

We have given this product a medium risk class rating of 4 out of 7. This means that it has a medium level potential for loss, and that SG 29 Haussmann may not be able to fully redeem your investment if market conditions deteriorate. This may affect SG 29 Haussmann's ability to pay you.

The Fund may also be exposed to the following risks which are not covered by the risk indicator:

Counterparty risk: This is the risk that a counterparty to an over-the-counter transaction with the Fund may be unable to honor its contractual obligations.

Credit risk: Deterioration in the credit quality of an issuer.

As this product offers no protection against market fluctuations, you could lose all or part of your investment.

Performance scenarios

The figures shown below account for all the costs that are inherent to the financial product, but not necessarily all of the fees you may owe to your advisor or distributor. They also do not take into account your personal tax situation, which may also affect the amounts you receive.

Your return from this Fund depends on the future performance of financial markets. Future market movements are random and cannot be accurately predicted. The unfavorable, intermediate and favorable scenarios presented below are examples based respectively on the Fund's worst, median and best returns and on the average performance of the appropriate benchmark index over the last 10 years.

Markets may behave quite differently in the future. The stressed scenario shows your hypothetical return under extreme market conditions.

Recommended holding period: 5 years
Investment: EUR 10,000

Scenarios		If you leave after:	
		1 year	5 years
Minimum return	No minimum return is guaranteed. You could lose some or all of your investment.		
Stressed scenario	Your hypothetical return net of costs	4 050 €	3 840 €
	Average annual return	-59.50%	-17.40%
Unfavorable scenario	Your hypothetical return net of costs	7 200 €	6 580 €
	Average annual return	-28.00%	-8.00%
Intermediate scenario	Your hypothetical return net of costs	10 260 €	16 720 €
	Average annual return	2.60%	10.80%
Favorable scenario	Your hypothetical return net of costs	13 800 €	22 860 €
	Average annual return	38.00%	18.00%

The unfavorable scenario occurred for an investment in the benchmark between December 2021 and December 2023.

The moderate scenario occurred for an investment in the benchmark between August 2015 and August 2020.

The favorable scenario occurred for an investment in the benchmark between December 2016 and December 2021.

What happens if the Fund sponsor is unable to redeem my shares?

If the management company that manages your Fund's assets defaults, this will have no effect on your investment. Your Fund depositary is responsible for the custody and safekeeping of your Fund's assets.

How much will this investment cost me?

We may share the costs with the person who sells you the product to cover the services they provide to you. That person will inform you of the amount.

COSTS OVER A 5-YEAR PERIOD

The tables below show the amounts taken from your investment to cover the various costs. These amounts depend on the amount you invest and on how long you hold your investment. The amounts shown here are examples based on a hypothetical investment amount and different possible investment periods.

We have assumed the following:

- that in the first year you would get back the amount you invested (0% annual return);
- that for the other holding periods the product will perform as shown in the intermediate scenario;
- EUR 10,000 are invested.

Investment: EUR 10,000	If you leave after:	
	1 year	5 years
Total costs	677 €	1 408 €
Annual cost in % (*)	6.81%	2.33% per annum

(*) It shows how much costs reduce your return annually over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average return per year is expected to be 13.13% before costs are deducted and 10.80% after costs are deducted.
