

INVESTMENT OBJECTIVE

The Global Horizon fund aims to overperform the Solactive GBS CW DM Int Large & Mid Cap EUR Index NTR (SCWUEJEN) (the "Benchmark Index"). In order to achieve its objective, the Fund gains exposure to the performance of a portfolio composed of 250 companies from Europe, the US and Japan, selected on the basis of both non-financial (ESG) and financial criteria, coupled with risk management mechanisms. The Global Horizon fund selects investments from a universe of large-cap companies offering sufficient liquidity. There are two guiding principles underpinning the selection process. The first is a strong ESG bias (described in the prospectus available on the website of the Management Company); the third of companies with the lowest ESG scores are excluded. The second, is a major focus on the quality of the assets selected: only the companies with the strongest financials and best fundamentals are retained. Once the selection is made, each holding within each component (Europe, the US and Japan) is given equal weighting. The components themselves, are weighted to achieve an allocation of 50% Europe, 40% US and 10% Japan. The fund's exposure to the basket of stocks is permitted to range from 0% to 150% to maintain a target volatility of approximately 15%. It is reviewed on a daily basis and adjusted for volatility. The Global Horizon fund's distribution policy establishes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments. If the dividends actually received by the fund are lower (or higher) than the fixed dividend distributed, the fund's actual net asset value will be lower (or higher) than that of a fund that pays out all of the dividends actually received. Regardless of the dividends actually received by the fund, the fixed dividend distribution policy has a greater impact on the fund's actual net asset value if the NAV falls relative to its initial level (negative effect) than if it rises (positive effect). This means that the fund's actual net asset value will fall at a faster rate in the event of a prolonged bear market.

MONTHLY COMMENT

Equity markets continued to advance in August despite a backdrop of heightened macroeconomic and geopolitical volatility. In the United States, major indices ended the month in positive territory, supported in particular by the technology sector. The Nasdaq Composite outperformed following strong earnings releases from Nvidia, which reignited investor enthusiasm for the artificial intelligence theme. After reaching new record highs in mid-August, the S&P 500 gave back part of its gains towards month-end amid rising bond yields and escalating tensions in the Middle East.

In Europe, performance was more mixed. The STOXX Europe 600 recorded a fifth consecutive month of gains, although the headline performance masked significant divergences across regional markets. Equities were initially supported by a broadly solid earnings season, particularly within the banking sector, where earnings beats substantially outnumbered disappointments. However, this positive momentum faded during the second half of the month, weighed down by rising energy prices, higher sovereign bond yields and a more hawkish stance from the European Central Bank. The French market was particularly affected by this environment, with the CAC 40 underperforming its European peers due to both domestic political uncertainty and its greater sensitivity to rising interest rates. Technology stocks were the main driver of performance across European markets. On the monetary policy front, the US Federal Reserve kept its policy rate unchanged at 3.75%, while growing divisions within the Federal Open Market Committee highlighted differing views on the need for further monetary tightening. In the Eurozone, the ECB maintained a more restrictive tone in response to inflation remaining above target, leaving its deposit facility rate unchanged at 2.25%.

Finally, geopolitical risk remained a key concern for investors. Tensions between the United States and Iran over the Strait of Hormuz fueled market volatility throughout the month, particularly through their impact on energy prices. Brief hopes of de-escalation were quickly overshadowed by renewed tensions towards month-end, weighing on overall market sentiment.
