

ALLEGRO TRANSATLANTIC

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive GBS CW DM US & Eurozone EUR Index NTR (SCWUEZEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets, while providing a fixed stream of distributions. The Benchmark Index is a broad liquid equity index (approximately 800 stocks) based on a custom weighting (50% US and 50% Eurozone).

The Fund is actively managed, the equity exposure may significantly deviate from the components of the Benchmark Index. The fund is article 6 of SFDR. The Portfolio exposure to each of the two following indices (Euro Stoxx 50 Price EUR Index (SX5E); and the (S&P 500 Index (SPX Index) will be predominantly weighted in accordance with (the "Methodology") developed by the Management Company. The Management Company retains discretion to deviate from such Methodology on an exceptional basis. The Portfolio consists primarily of financial futures positions rolled on financial indices. Rolled financial futures composing the Portfolio will be selected by a proprietary methodology designed by the Management Company which relies on a financial analysis that ranks the instruments of the Investment Universe. The variable exposure mechanism implemented by the Fund aims to provide the Fund with an average exposure to equity markets over five years that exceeds 80%. The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). In order to mitigate risks or enhance the Sub-Fund's performance, the exposure of the Fund to equity markets through the Portfolio may vary between 0% and 200% on a weekly basis at least. As a result, the exposure may drift between such adjustments.

The Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

The beginning of the trade war weighs on the markets. March was marked by a significant increase in economic uncertainties related to U.S. trade policy. Indeed, the U.S. government raised the tariff rate by 20 points on all Chinese imports, by 25 points on a basket of Mexican and Canadian imports, and by 25 points on iron and aluminum imports. Moreover, the U.S. government is considering further significant tariff increases covering all imports. In this context, consumer and business confidence indices have deteriorated sharply, with a significant rise in inflation expectations, and household consumption data suggest a slowdown in growth in Q1-25. European activity data also point to weak activity in Q1-25. However, inflation continues to decrease and converge towards the ECB's 2% target, which should lead the latter to continue its interest rate cut cycle.

In this context, stock markets have corrected downward. In the United States, the S&P 500 fell by 5.8% in March, while the Nasdaq recorded a decline of 7.7%. IT companies were the main contributors to this decline (the magnificent 7 dropped by 10.2% in March), mainly due to concerns about overinvestment. Furthermore, the discretionary consumer sector also fell significantly during the month (-9%), as markets feared a more pronounced slowdown in consumption. In Europe, markets showed more moderate declines, with the Eurostoxx 50 down by 4% due to the exposure of European industrial companies to U.S. tariffs and the slowdown in consumption. In this geopolitical context, defensive "quality" companies prove to be the most resilient, thanks to their solid business models and their ability to maintain stable revenue streams.
