ANDANTE TRANSATLANTIC

INVESTMENT OBJECTIVE

The investment objective of SOLYS – ANDANTE TRANSATLANTIC (the “Sub-Fund”) is to generate performance over the long term by exploiting investment opportunities on the equity markets while providing a fixed stream of distribution. There is no pertinent or relevant benchmark index for the Sub-Fund, due to its actively managed investment strategy. Investor may however choose to use the Solactive GBS CW DM US & Eurozone EUR Index NTR index for indicative ex-post performance comparison purposes.

Equities composing the Portfolio will be selected by a proprietary methodology designed by the Management Company (the "Methodology") which relies on a non-financial analysis that ranks the instruments of the Investment Universe based on a combination of ESG (Environmental, Social, Governance) criteria combined with a financial analysis that includes bias towards equities issued by companies that should take advantage of reshoring initiatives. The variable exposure mechanism implemented by the Fund aims to provide the Fund with an average exposure to equity markets over five (5) years that exceeds 80%.The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). In order to mitigate risks or enhance the Sub-Fund’s performance, the exposure of the Fund to equity markets through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments.

The Fund activated share class distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

October 2026 highlighted a clear transatlantic divergence. US markets were weighed down by a historic selloff in AI and semiconductor stocks, higher-than-expected inflation, surging oil prices, and extremely bearish investor positioning, with the Nasdaq-100 bearing the brunt of the decline.
In contrast, Europe benefited from its structural underexposure to the AI theme and a rotation toward defensive and industrial sectors. The Stoxx 600 delivered its best monthly performance since June, while France suffered from waning investor interest due to political and fiscal uncertainties, and the Euro Stoxx 50 ended the month lower as a result of its heavier exposure to financials and technology-related stocks.
Central banks maintained a broadly hawkish stance. Both the Federal Reserve (Fed) and the European Central Bank (ECB) had raised rates in September and signaled that further tightening remained possible. Meanwhile, the Bank of England (BoE), although keeping rates unchanged, moved closer to its first rate hike in more than three years.
Strong US third-quarter GDP growth (+3.4%) provided some support to the macroeconomic outlook. However, persistent inflationary pressures and elevated energy costs continued to cloud the interest rate outlook heading into November.
