

AB GLOBAL DEVELOPED HEALTH CARE

31 March 2026

INVESTMENT OBJECTIVE

The investment objective of the Fund is to outperform the Solactive Developed Markets Broad Health Care EUR Index NTR (SDMBHCEN) (the "Benchmark Index") over a long-term horizon by exploiting investment opportunities on the equity markets. The Benchmark Index is a broad liquid equity index (approximately 840 stocks) which intends to track the performance of Health Care companies from the Developed Markets within the Solactive Global Benchmark Series and the Solactive United States Benchmark Series. The Fund is actively managed, the equity exposure may significantly deviate from the components of the Benchmark Index. The fund is article 8 of SFDR.

Within the Investment Universe, equities composing the Portfolio will be selected by the Investment Manager, according to their ESG scoring, based on a best-in-class approach. Equities of the Investment Universe will be ranked using proprietary ESG materiality weightings, and a combination of fundamental ESG scores and third-party ESG management assessments; the Investment Manager's ESG research is used to determine ESG risk factor scores. The selection of equities composing the portfolio is achieved by excluding at least 20% of the stocks comprising the investment universe with the lowest rating. More than 90% of the equities composing the Portfolio do benefit from an ESG rating. The Portfolio will be rebalanced monthly respecting the methodology. However, the Management Company may decide to rebalance the Portfolio at any time at its discretion (the "Rebalancing Date"). The exposure of the Fund to equities through the Portfolio may vary between 0% and 150% on a weekly basis at least. As a result, the exposure may drift between such adjustments.

The Fund distributes a fixed dividend of EUR 5 per fund unit per year, divided into 12 identical monthly payments.

MONTHLY COMMENT

The month of March was heavily marked by the conflict in the Middle East and the closure of the Strait of Hormuz, reigniting tensions in hydrocarbon markets. Oil has been at the heart of the crisis, with significant volatility: Brent surged by 46% in March (+70% YTD) and WTI by 56% (+78% YTD), rekindling fears of a renewed wave of global inflation.

In the United States, the first activity indicators for March—the Purchasing Managers' Index (PMI)—signal a slight slowdown. The composite index fell by 0.5 points compared with February, reaching 51.4, while still remaining in expansion territory.

U.S. consumer inflation (CPI) for February remained stable compared with January, at 2.4%, and 2.5% for core inflation. At its March 18 meeting, the Federal Reserve kept its policy rates within the 3.50% to 3.75% range. Market expectations shifted considerably over the month, moving from anticipating two rate cuts to expecting one rate hike by year-end.

In the euro area, the PMI survey also points to a slowdown in activity. The composite index declined from 51.9 in February to 50.5 in March, but this drop stems mainly from services, while the manufacturing sector improved slightly. Eurozone inflation reached 2.5% in March, a 0.6point increase compared with February, surpassing the European Central Bank's (ECB) 2% target. The ECB is maintaining its policy rate at 2.00% for now but stated it is ready to act if inflationary pressures persist. The institution also revised its growth forecast downward—to 0.9% for 2026 (-0.3 points compared with December)—and its inflation forecast upward (+2.6%). As in the U.S., market expectations shifted significantly, with investors now anticipating three rate hikes over the course of the year. In this turbulent context, equity markets experienced a sharp correction and turned negative. In March, U.S. indices posted heavy losses: -5.5% for the S&P 500 and -5.17% for the Nasdaq 100. In the euro area, which is more sensitive to energy-related tensions, rising prices have weighed even more on markets: the EUROSTOXX fell by more than 8%, the CAC 40 by 9%, the DAX by 10%, and the IBEX by 7%.
